EDUCATION

Simon Fraser University   **September 2023 - April 2026**
Bachelor's, Computer Science

BrainStation   **March 2024 - June 2024**
Bootcamp, Software Engineering

PROFESSIONAL EXPERIENCE

Wize Computing Academy   **Vancouver, BC, Canada**
Business Development Intern   *June 2020 - September 2020*
- Executed a successful marketing strategy independently, engaging with 60+ potential customers and partners and increasing productivity and dependability.
- Established and elevated the startup's online and local presence through social media marketing, driving a 70% increase in sales and demonstrating exceptional collaboration and creativity.
- Collaborated with a small team of 4 to design, implement, and test content delivery across platforms, earning high praise for quality and delivery.

PROJECTS

Simple Chef - Full Stack Recipe Recommendation website - *Link to project*   *June 2024 - June 2024*
Lead Developer
- Developed and deployed a CRUD-based full-stack web app for discovering and sharing three-ingredient recipes using MERN stack, featuring recipe search, secure JWT-based user authentication, and profile management.

BundleTV - Industry Project - *Link to project*   *May 2024 - May 2024*
Frontend Developer
- Led a six-member team to create a mobile-friendly React app for custom TV packages, in 24 hours, enhancing accessibility and user experience, and successfully presenting it to Telus with positive stakeholder feedback.

InStock - Full Stack React Inventory Management System   *May 2024 - May 2024*
Web Developer
- Collaborated in an agile team at BrainStation to replace a client's outdated inventory system with a scalable, full-stack solution, enhancing system performance.
- Developed an end-to-end responsive user interface using React, adhering to Figma mockups and style guides to improve user experience and engagement.
- Engineered a high-performance back-end with Express, Node.js, and MySQL, optimizing data management and retrieval processes.
- Utilized Jira for project management, Figma for design collaboration, and Git/GitHub for version control, ensuring seamless teamwork and project tracking.
- Delivered a robust inventory management system, demonstrating strong full-stack development skills and effective use of agile methodologies.
